HP: IT security weak because enterprises aren't learning

IT World Canada

Philosopher Geroge Santaya once said those who cannot remember the past are condemned to repeat it. IT security researchers say the same thing: enterprises keep making the same mistakes that allow attackers to successfully invade.

CIPS AB Calgary March 3 Lunch: 'Productivity and the Information Technology Professional'

CIPS

Productivity and productivity improvement are some of the most talked about topics in business circles today, but what does it all really mean? How does it relate to the role of Information Technology professionals in business, and how can IT professionals help drive improvements across the business.

Featured Whitepaper: 'Cisco Mobility Solutions Overview: For Large and Midsize Organizations'

CIPS

For the past few years, many companies have been focused on simply understanding how mobile devices are impacting their businesses, and controlling their inherent risks. Today, leading companies are instead looking to rethink the way both employees and customers can use mobile devices to their benefit.

How good a techie are you? Objective about yourself and your skills?

The Register

How objective are you? Can you design IT solutions outside your own experience? Are you capable of testing unfamiliar and uncomfortable software, services and solutions with an open mind or do you immediately lash out against the mere idea of change?

CIPS PEI 2015 Curling Event: March 6

CIPS

The 2015 CIPS PEI Curling Event will be held on Thursday, March 6. As with previous years, this is a "for fun" event and no previous curling experience is required to participate. Curling is a great social event for networking since teams play two (4 end) games against other teams — not to mention the camaraderie fostered with fellow co-workers and teammates!

Should we strike back against hackers?

IT World Canada

IT security firm Kaspersky recently revealed that over 100 banks had been hacked across some 30 countries. The hackers, who had been at it for at least two years, made up to \$1 billion in ill-gotten gains, the firm said, adding that hackers were now attacking banks directly rather than stealing money from their customers.

World Summit on the Information Society Forum 2015

WSIS

The World Summit on the Information Society Forum 2015 represents the world's largest annual gathering of the "ICT for development" community. The WSIS Forum, co-organized by ITU,

UNESCO, UNDP and UNCTAD, in close collaboration with all WSIS Action Line Facilitators/Co-Facilitators, has proven to be an efficient mechanism for coordination of multistakeholder implementation activities, information exchange, creation of knowledge, sharing of best practices and continues to provide assistance in developing multistakeholder and public/private partnerships to advance development goals.
