TOP NEWS

Computers will detect our emotions and share that information

IT World Canada

As early as this summer there may be movies that adjust their plot depending on what emotions are detected on your face. The Wired article that reports this also suggests that there will be issues of trust. Their example was that the software may notice that you are sad most of the time and sell that data to a

pharmaceutical company. [READ MORE](#)

Featured Whitepaper: State of Security Operations

CIPS via IT World Canada

Organizations around the globe are investing heavily in IT cyber defense capabilities to protect their critical assets. Whether protecting a brand, intellectual capital, and customer information or providing controls for critical infrastructure, the means for incident detection and response to protect organizational interests have common elements: people, processes, and technology. **READ MORE**

CIPS AB Edmonton March 14 Dinner Event: 'Internet of Things (IoT)'

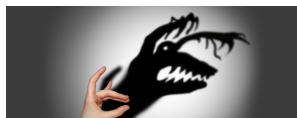

CIPS

During the past 20 years, the Internet revolution has redefined how individuals use computers for personal and business. In the next five years, the Internet of Things (IoT) also called the Industrial Internet will transform how manufacturing, energy, transportation and other industrial sectors operate in a profound way. These industrial sectors account for nearly two-thirds of the global (GDP). IoT is transforming how people work through new interactions between humans and machines. **READ MORE**

Shadow IT takes the pressure off the CIO

IT World Canada

Many pundits appear to believe that even small amounts of shadow IT is a recipe for chaos that ensures poor organizational performance and significant under-achievement of IT benefits. Shadow IT is the label used to describe IT computing infrastructure, software and external IT services being used by departments without explicit organizational approval and without IT department involvement. **READ MORE**

CIPS SK Saskatoon March 16 Luncheon: 'SMART Infrastructure in Communities'

CIPS

One of the challenges that communities face, is that "smart" infrastructure components now require expertise to evaluate their infrastructure investment — from a technology perspective. Lexcom is working with progressive community leaders at how technology and "internet of everything" plays into their strategy, budget and asset management. **READ MORE**

Keeping our head in the clouds: Cloud computing policy

IFIP

The IFIP Domain Committee on Cloud Computing (DCCC) met in Milan, Italy earlier this month to progress its work in providing cohesive thought leadership on cloud-related issues. Norberto Patrignani, Chair of IFIP's Domain Committee on Cloud Computing (DCCC) and Senior Associate Lecturer in Computer Ethics at the Doctorate School of Politecnico of Torino, said the committee is considering a range of possible initiatives where IFIP can take the lead. IT in Disaster Risk Reduction: A proactive approach to disaster response

IFIP

In response to the increasing incidence of serious natural disasters around the world, IFIP has proposed the establishment of a Domain Committee on Information Technology in Disaster Risk Reduction (ITinDRR). Chaired by Yuko Murayama (Chair of IFIP TC11), the Committee also includes Diane Whitehouse (Chair of IFIP TC9 — ICT and Society), Erich Neuhold, Plamena Zlateva and Dimiter Velez with IFIP General Secretary Eduard Dundler providing liaison support.
