3-D printers are a new means of production, but that might not be a good thing

IT World Canada

As with all new technology, 3-D printers can have both positive and negative implications. In the case of these printers, they are a new means of production. For employees who work in the production and manufacturing of the products that can easily be made with 3-D printers, it is clear that the introduction of these machines to homes or offices would have a negative impact on jobs.

CIPS ON London March 26 Event: 'An Introduction to Data Governance and what you need to know'

CIPS

Data governance (DG) refers to the overall management of the availability, usability, integrity, and security of the data employed in an enterprise. Glendalynn will be presenting an introduction to the emerging field of Data Governance. Many aspects of Data Governance have been around for decades, so what is driving the need to redirect these efforts under one umbrella?
