CIPS Webcast: Richard Baker: 'Advanced Information Security Defense Techniques and Approaches' (Member-Only Content)

CIPS

We live in a world consumed and bombarded with constant news of Advance Persistent Threats, modern malware and insider threats. Our presentation focuses on the variety of techniques, approaches and solutions administrators and security analysts can use to keep their networks and systems secure. We contrast traditional security approaches to modern techniques developed to combat the ever evolving security threats.

CIPS ON Toronto June 19th Event: 'IT Megatrends - How to Take Advantage of Them?'

CIPS

How does your business embrace new technology? Mobile devices and social computing are transforming business processes and employee productivity. The cloud and big data are becoming key enablers of innovation for businesses of all sizes. Ignoring emerging technologies presents risk. Embracing them presents opportunity.

A cloudy future for higher education

IT World Canada

As the date of the 2014 High Performance Computing Conference in Halifax grows near, the conference program highlights the increasingly pervasive state of computing in our world. Indeed the conference theme "HPC serving society" speaks to the broadest of mandates and a world where access to and proper use of computing technologies is critical to all areas of life.

5 takeaways on privacy

IT World Canada

When organizations create online privacy policies they have to first follow the legislative and regulatory rules that apply to them. There's also the concern to the corporate brand should there be a data leak. Beyond that they also should consider the attitudes of their customers towards privacy. A recent international privacy survey by storage vendor EMC of 15,000 consumers in 15 countries, including Canada, holds interesting results.
