Canadian Cyber Defence Challenge - Bringing high school students and security professionals together

CIPS

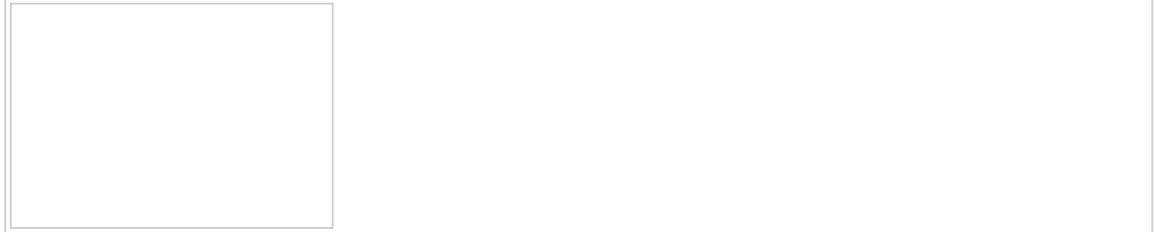

The Canadian Cyber Defence Challenge (CDC) is the first program in Canada that brings high school students and security professionals together in an attempt to raise cyber-security awareness amongst Canada's youth. The CDC is led by a team of professionals representing three primary support organizations: Canadian Information Processing Society (CIPS) Manitoba, International Information Systems Security Certification Consortium, Inc., (ISC), Manitoba/Saskatchewan Chapter and ISACA Winnipeg.

Private, Hybrid, Public: What Cloud Keeps Your Organization Connected? (via Microsoft TechNet)

CIPS

Microsoft prides itself in providing three base offerings of cloud services: Private, Hybrid and Public.

All three have their advantages and so organizations must do their due diligence to ensure the best fitting option is chosen. Ensuring the right fit for your organizations implementation will appease executives, will help increase employee productivity and if done correctly will allow for growth.

European court: Google does not have to delete	CIPS INTERVIEWS: Chat with Shafi Goldwasser CIPS	Information technology training for non-IT professionals to boost

sensitive information

The Guardian

Google is not obliged to delete personal information from its search results, even when that information damages an individual's reputation, an adviser to the European court of justice has decided. In a long-running case about the "right to be forgotten" by search engines, judges have been asked to rule on whether Google should be treated under law as a publisher of information or simply a host.

Washington University in St. Louis

Each year, about 431 million adults worldwide are victims of cybercrime, costing \$388 billion based on time and monetary loss. The problem is so severe that President Barack Obama recently said, "cyber threat is one of the most serious economic and national security challenges we face as a nation." To address this growing need, the Washington University in St. Louis School of Engineering & Applied Science, partnering with WUSTL's Olin Business School, is launching a master's degree in cyber security management in fall 2013 to provide area professionals and full-time students with the skills needed to prepare for and stop cyber attacks in their workplace.
