CIPS 2012-2013 Annual Report now available

CIPS

In early 2012, CIPS members from across the country came together to create a plan for a renewed and enriched CIPS. Through February to June of 2012 the transformation plan was fleshed out with the help of the coalition, the Strategic Planning Committee and Michael Schiel of Western Management Consultants. The Strategic Planning Committee and Executive Council believed that the highest priority was the immediate need to raise funds.

Passionate about IT Professionalism? Become an IT World Canada Blogger

CIPS

IT World Canada is providing CIPS members an exclusive opportunity to become a blogger on professionalism issues in IT. As a community blogger you'll work with the ITBusiness.ca editorial staff to develop story ideas and deliver them on schedule. All IT World Canada community bloggers have a specific focus area based on their experience and expertise to serve as a base to develop story ideas around. The IT World Canada CIPS Blog will be centered on the wide variety of topics related to professionalism in IT (i.e. risk management, security operations, intellectual property, privacy, computer crime, software ownership, professional responsibility, etc.)

Windows Server 2012 R2, Already??

CIPS

As IT professionals we're always looking for ways to better serve and support our business units. To make things more efficient and robust. Well, keeping that in mind, on June 3rd at TechEd North America, we announced a new version of our server OS. Windows Server 2012 R2 which by the way, is available for download now. It's at the heart of our Cloud OS vision and it can bring unprecedented scale to your infrastructure. I am amazed at how much innovation we packed into this releases — especially in such a short time.

What economists can teach us about cloud computing

Computerworld UK

Cloud computing is a curious phenomenon because much of the uptake is by groups that traditionally didn't drive adoption or even get much involved in infrastructure decisions — application groups and software developers. They've embraced cloud computing, particularly Amazon Web Services, with gusto-so much so that central IT has developed new terminology to describe it: shadow IT, or, even more witheringly, rogue IT.
