Help CIPS support professionalism and ethics in I.T.

Indiegogo

In the wake of HeartBleed and the numerous recent privacy breaches that have created growing concerns, the need for professionalism and ethics in I.T. has never been higher. We live in a highly connected world where technology has become the central nervous system of our modern society.

Featured Whitepaper: SOLVING FOR 'TOTAL COST' IN THE CLOUD

CIPS via IT World Canada

As more and more organizations migrate to the cloud, many are faced with hidden costs emerging from unexpected places. Two non-obvious and non-trivial factors can drive up costs. First are separate charges for everything from server memory to intrusion detection.

Why IT needs to prepare for an environment with fewer Windows

IT World Canada

Many CIOs still think that this is a Microsoft-dominated world when they look at the number of Windows desktops and servers in their environment. But a report last week from Gartner and comments from Microsoft officials this week at its annual Worldwide Partner Conference in Washington, D.C., may give them pause to reconsider.

CIOs in Canada may be overlooking a way to finance innovation

IT World Canada

Until "innovation" becomes a standard line item in a CIO's budget, the best recourse for Canadian IT leaders may be a federal tax incentive that could help them cover the costs of potentially groundbreaking initiatives. Last month the CIO Association of Canada held an information session for its members about the Scientific Research and Experimental Development (SR&ED) program.

Canada recruits Colombia's best bilingual tech professionals

Columbia Reports

An agency in charge of economic development in Quebec City has begun a virtual campaign to recruit Colombia's most talented bilingual Information Technology (IT) professionals. Colombians proficient in French who are interested in working in Quebec can gain access to employment opportunities made available by Quebec International, according to Colombia's financial magazine *Dinero*.

Canadian companies to ramp up deployment of the 'Internet of Things'

Business In Vancouver

Workers at Arrow Transportation Systems used to spend hours collecting mechanical data and driver safety information from its truck drivers once the vehicles arrived back at dispatch centres. When it came time to upgrade this system of data collection seven years ago for its 300-truck fleet, the Vancouver-based company outfitted all its vehicles with mobile SIM cards allowing for instant wireless monitoring.
