5 BYOD best practices

IT World Canada

A number of CIOs are eager to allow staff to bring their own devices to work, with the enterprise either completely or partly paying for connectivity. But Dell notes that while BYOD initiatives can be great for employees, they often pose a potential nightmare for the organization if regulations aren't complied with. Here are five best practices it recommends.

Kaspersky: IT struggling with virtualization security

Computer Dealer News
Virtual infrastructures continue to grow in importance for enterprises worldwide and securing virtual environments is top of mind for the majority of IT departments, but a recent survey has revealed that as many as one out of four IT professionals "have little or no understanding" of their virtualization security options.

Help build a prioritized list of National Occupational Standards (NOS) for Business Technology Management (BTM) occupations

CIPS

Are you a Human Resources (HR) person or an "in the trenches" ICT professional at the B or C managerial level, who has technical knowledge and understanding of Business Technology Management (BTM) related occupations under your jurisdiction or perhaps you know an individual within your company who fits this profile? The BTM area includes occupations such as business analysis, project management, change management, consulting, entrepreneurship, and IT management.

Elasticsearch vulnerability leads to DDoS malware on Amazon

IT World Canada

Security professionals usually don't have to worry about the search engines their organizations chose for plowing through corporate data. But researchers at Kaspersky Labs say attackers are exploiting a vulnerability in the open source Elasticsearch engine to install distributed denial of service (DDoS) malware on Amazon and possibly other cloud servers.

Help CIPS support professionalism and ethics in I.T.

Indiegogo

In the wake of HeartBleed and the numerous recent privacy breaches that have created growing concerns, the need for professionalism and ethics in IT has never been higher. We live in a highly connected world where technology has become the central nervous system of our modern society. Technology has changed our world for the better, but technology also has fantastic potential for misuse as far too regularly witnessed.
