## Hackers using new Windows vulnerability

IT World Canada

Microsoft is rushing out a patch for a newly-discovered zero-day vulnerability which affects all currently supported versions of Windows (including Vista) and Windows Server 2008 and 2012. The news came this morning from security firm iSight Partners, which in conjunction with Microsoft discovered the hole in the OLE package manager in the client and server versions of

Windows after attacks on unspecified NATO countries and institutions (Canada is a member of NATO), academic institutions in the U.S., Ukrainian government organizations, Western European government organization, energy sector firms (specifically in Poland) European telecommunications firms United States academic organization.

## CIPS SK Oct. 22 Regina Luncheon Presentation: 'Leading Change. And the Projects that Make Us Crazy'

CIPS

This talk covers the nuances of leading change in large organizations. Core concepts are introduced to contextualize popular methodologies such as PROSCI. Real life examples are provided to help analysts understand how change efforts are typically mismanaged and what can be done to minimize or avoid the ensuing insanity.

### **Learning the language**

IT World Canada

The computing world owes a lot to Unix, and not just because it spawned Linux and Apple's OS X. Unix also was responsible for the C programming language (announced in 1973), which today stands at the top of many lists as the most popular development language in use around the world.
