## CIPS Webcast: Jeannot Blanchet — 'The Role of Technology in Creating the Financial Institution of the Future' (Member-Only Content)

CIPS

In this presentation, we will look at the profound structural changes happening in the global financial services industry since the 2008 financial crisis, and the major trends which will affect the Canadian financial services industry in the coming years. In particular, the important role of the exponential changes in technology in the next five to 10 years will be discussed in the context of financial services.

## Privacy commissioner: Metadata needs protection

IT World Canada

If CSOs and privacy officials have any doubts that metadata can be used to find personal information on an individual, a new paper from the office of the federal privacy commissioner should clear it up. The report warns policy makers and the private sector that metadata collected from telecom and Internet communications can reveal a lot about a person, and therefore devices privacy protection.

## ICE Conference

CIPS

Organized by CIPS Alberta and supported by a wide range of local, national and international sponsoring companies, the CIPS ICE® conference is in its 33rd year. To be in business today, any business, we need to understand how choices in technology affect our future. Organizations need to invest in new skills while remaining strategic during operations and employees need to learn new skills to stay current while working full-time.
